

Note 1: This outline contains the net dimensions of the **Spoon Sports** Monoblock calipers and is designed to represent all high points. It is recommended that you allow at least 2mm of clearance for safety (see broken line for reference).

Note 2: Verify printout is to scale by matching a dimension in both height and width using a ruler or other measurement scale. One dimension in each direction is shown in both millimeters and inches.

Note 3: Fitment of caliper is dependant on correct offset, pad type, wheel spoke, and hub design. **This template is for REFERENCE ONLY**

Directions for use: Glue template to a stiffer material such as cardboard, cut out template along dashed lines, place in wheel to check fitment.
